

Occupational Medicine

Outpatient occupational therapy at Trinity is provided both as an extension of services received as an inpatient or you can receive services as a new patient. We are staffed to provide expertise with all neurological and orthopedic disorders and specialize in the area of hand disorders.

Disorders/injuries include (but not limited to):

- Stroke
- Multiple sclerosis
- Muscular dystrophy
- Arthritis
- Amputee
- Total Hip or knee arthroplasty
- Carpal tunnel syndrome
- DeQuervain's tendonitis
- Fractures/disorders
- Sprains
- Dupetryns contracture
- Nerve/tendon lacerations
- Acute trauma

We provide:

- Exercise
- Modalities - paraffin, ultrasound, iontophoresis, fluidotherapy and E-stim
- Functional activities
- Splinting/bracing
- ADL training

If you or someone you love has had an injury or any of these disorders, please call us with any questions or for an appointment. Our occupational therapy campus is at:

Trinity Health System
West Campus (medical office building)
