Trinity Surgical Care

At Trinity Health System, we treat every surgery — no matter how minor or major — with the precision you deserve to get you back to the life you love.

From common procedures like appendectomies and tonsil removal, to specialty surgeries like reconstructive and bariatric, Trinity leads the way in expertise and experience.

Trinity Health System is also the first health system in the region to offer a breakthrough technology that has transformed the way surgical procedures are done: the da Vinci Surgical System. Often called the “gold standard” of single-site robotic assisted surgery, the technique drastically reduces recovery time for gynecological, general and other surgeries.

Our surgical team is dedicated to leading the way to get you back on your feet. When you choose Trinity, you don't need to travel far for experienced staff, state-of-the-art surgeries and — most importantly — the best possible outcome.
